## Professional Summary

DevOps Engineer with around 3 years of experience at VSM Infotech Pvt Ltd, working on client projects in healthcare and banking. Runs AWS infrastructure for a healthcare platform (EC2, EKS, IAM, CloudWatch) and Microsoft Azure infrastructure for a digital banking platform (AKS, ACR, VNets, Key Vault, Azure Monitor). Builds CI/CD pipelines with Jenkins, GitHub Actions, GitLab CI/CD, Azure DevOps, and Argo CD; provisions infrastructure with Terraform, CloudFormation, Azure Bicep, and Ansible; and runs Docker and Kubernetes workloads on EKS and AKS. Skilled in Linux administration, Python and Bash scripting, DevSecOps quality gates, monitoring and alerting, incident troubleshooting, and production release support.

## Technical Skills

**Cloud Platforms**: AWS, Microsoft Azure, Google Cloud Platform (GCP)
**AWS Services**: EC2, EKS, ECS, ECR, S3, VPC, IAM, RDS, DynamoDB, Lambda, ALB/NLB, CloudWatch, Route 53, Certificate Manager
**Azure Services**: AKS, ACR, Virtual Machines, VNets, NSGs, Azure Storage, Key Vault, Azure Monitor, Log Analytics, Azure RBAC
**Infrastructure as Code**: Terraform (Reusable Modules, Remote State), AWS CloudFormation, Azure Bicep, Ansible
**Containers & Orchestration**: Docker, Kubernetes (EKS, AKS), Helm, Ingress, ConfigMaps, Secrets, Namespaces, RBAC
**CI/CD & GitOps**: Jenkins, GitHub Actions, GitLab CI/CD, Azure DevOps (Pipelines, Repos), Argo CD
**Linux Administration**: Ubuntu, RHEL, Amazon Linux, systemd, User & Permission Management, Patching, SSH Hardening
**Web Servers & Databases**: NGINX, Apache, MySQL, Amazon DynamoDB
**Scripting & Version Control**: Python, Bash/Shell, YAML, Git, GitHub, GitLab
**Monitoring & Logging**: Prometheus, Grafana, Alertmanager, ELK Stack, Splunk, AWS CloudWatch, Azure Monitor, Log Analytics
**Networking**: TCP/IP, DNS, Routing, Load Balancing, SSL/TLS, VPN, Firewalls, Security Groups, NSGs
**DevSecOps**: SonarQube, Trivy, Snyk, IAM, Secrets Management, Vulnerability Scanning, Security Quality Gates
**Reliability & Operations**: High Availability, Autoscaling, Incident Management, Root Cause Analysis, Backup & Recovery
**Tools & Practices**: Jira, ServiceNow, GitHub Copilot, Amazon Q, Agile/Scrum, Change Management, Runbooks

## Professional Experience

**DevOps Engineer** **Mar 2025 – Present**
*VSM Infotech Pvt Ltd*
**Project:** Healthcare Application Cloud & DevOps Platform **Domain:** Healthcare

- Managed AWS infrastructure using EC2, VPC, IAM, S3, RDS (MySQL), DynamoDB, EKS, and CloudWatch for healthcare applications and production operations.
- Built and maintained 15+ CI/CD pipelines using Jenkins, GitLab CI/CD, and GitHub Actions to automate application builds, testing, and deployments.
- Provisioned infrastructure with reusable Terraform modules and remote state, configured servers with Ansible, and ran infrastructure changes through GitLab CI/CD.
- Containerized healthcare microservices with Docker and deployed 15+ workloads on Kubernetes (EKS) using Helm and Argo CD GitOps workflows, managing Ingress, ConfigMaps, Secrets, and RBAC.
- Configured ALB/NLB, Kubernetes Ingress, and NGINX reverse proxies, and managed SSL/TLS certificate issuance, renewal, and TLS termination with AWS Certificate Manager.
- Implemented monitoring, alerting, and centralized logging using Prometheus, Grafana, Alertmanager, CloudWatch, and the ELK Stack to speed up troubleshooting and root cause analysis.
- Integrated SonarQube and Trivy quality gates into pipelines, enforced least-privilege IAM, and supported 10+ monthly releases, production incidents, and on-call activities with runbooks.
- Used GitHub Copilot and Amazon Q to speed up Terraform modules, Kubernetes manifests, and Python and Bash automation, and to analyze CI/CD failures and application logs.

**Junior DevOps Engineer** **Mar 2024 – Feb 2025**
*VSM Infotech Pvt Ltd*
**Project:** Digital Banking Cloud & DevOps **Domain:** Banking

- Managed Microsoft Azure infrastructure, including Virtual Machines, VNets, NSGs, Azure Storage, Key Vault, and Azure Monitor, for secure and highly available digital banking applications.
- Built and maintained 10+ CI/CD pipelines using Azure DevOps and Jenkins to automate builds, testing, and deployments across development, staging, and production.
- Containerized 10+ banking microservices with Docker and deployed them on Azure Kubernetes Service (AKS) through Helm releases, managing Ingress, ConfigMaps, Secrets, Namespaces, and RBAC.
- Managed Azure Container Registry (ACR) to build, tag, and store Docker images, and integrated image publishing into the CI/CD pipelines.
- Provisioned Azure infrastructure with Terraform and Azure Bicep, replacing manual setup with repeatable, version-controlled code.
- Automated server configuration and application deployment across 15+ Linux servers using Ansible and shell scripting, including patching, systemd services, and SSH hardening.
- Implemented monitoring, centralized logging, and alerting with Prometheus, Grafana, Azure Monitor, and Log Analytics to support troubleshooting and root cause analysis.
- Integrated SonarQube and Trivy scans and quality gates into Azure DevOps pipelines, and automated rolling deployments and health checks for consistent banking releases.

## Projects

**End-to-End DevSecOps CI/CD Pipeline on AWS EKS** | *Jenkins, Terraform, EKS, SonarQube, Trivy*

- Built a Jenkins pipeline with SonarQube and Trivy quality gates, deploying to an EKS cluster provisioned with Terraform.
- Added zero-downtime rolling updates, a PodDisruptionBudget, automatic rollback, and post-deployment smoke tests.

**Kubernetes Monitoring and Observability Stack** | *Python, Prometheus, Grafana, Helm*

- Built a Helm-based monitoring stack with 10 alert rules, a 15-panel Grafana dashboard, and Slack alert routing.
- Instrumented a Python service with custom metrics; CI validates the stack end to end on a kind cluster.

**Multi-Cloud Infrastructure as Code** | *Terraform, Ansible, AWS, Azure*

- Developed six reusable Terraform modules with isolated development, staging, and production environments and remote state.
- Wrote Ansible roles for Linux patching, firewall rules, SSH hardening, and fail2ban.

## Certifications and Training

**AWS Certified Cloud Practitioner** – Amazon Web Services **Sep 2025**
**AWS re/Start Program** – Cloud Computing, Networking, Security, and Linux **Jul 2025 – Aug 2025**

## Education

**HKRH College, Madurai Kamaraj University** **2022 – 2025**
*Bachelor of Science in Computer Science – CGPA: 7.2/10* *Theni, Tamil Nadu*

## Additional Information

**Notice Period:** Immediate Joiner | **Relocation:** Open to Relocation | **Languages:** English, Tamil
